### Recommendations Guide

**LONG-TERM BUY:** The Company has strong fundamentals. However, there are certain investments or strategies that would require an investor to have a long-term view of the company to allow for capital appreciation. Also, the company may be facing headwinds which we view as short term

**BUY:** Strong fundamentals. Minimal risks to the catalysts/growth drivers

**NEUTRAL:** This is where the positives and negatives in a company almost balance out. You can accumulate for the long term

**SELL:** Deteriorating fundamentals. Risks outweigh the catalyst/growth drivers
