### Recommendations Guide

**LONG-TERM BUY:** The Company has strong fundamentals. However, there are certain investments or strategies that would require an investor to have a long-term view of the company to allow for capital appreciation. In addition, the company may be facing headwinds that we view as short term

**BUY** strong fundamentals. Minimal risks to the catalysts/growth drivers

**NEUTRAL:** This is where the positives and negatives in a company almost balance out. You can accumulate for the long term

**SELL** deteriorating fundamentals. Risks outweigh the catalyst/growth drivers
